

**Analyst, Operations
Toronto, Ontario**

Blumont Annuity Company, formerly known as Brookfield Annuity Company, is a life insurance company licensed in 2016. We are the only Canadian life insurer that is primarily focused on providing annuity solutions to defined benefit pension plans, associations and individuals across Canada. The company has experienced exponential growth since inception, ranking 2nd in group annuity sales in 2024 and is well-positioned for long-term success.

For more information about Blumont Annuity Company, visit our website at www.blumontannuity.ca.

Blumont Annuity Company is wholly owned by **Brookfield Wealth Solutions Ltd.** ("BWS"). BWS is focused on securing the financial futures of individuals and institutions through a range of retirement services, wealth protection products and tailored capital solutions. Through its operating subsidiaries, BWS offers a broad range of insurance products and services, including annuities, personal and commercial property and casualty insurance and life insurance.

We are seeking an **Analyst** to join the Operations team reporting to the Director, Operations. This role supports key processes across the group annuity lifecycle, with a focus on premium adjustments, data management, and operational delivery. This is a detail-oriented role that combines data analysis, process execution, and client-facing reporting. The successful candidate will work closely with cross-functional teams to ensure accuracy, consistency, and timely delivery of outputs.

If you have a financial reporting & analytics background and enjoy solving real business problems, we want to hear from you.

Responsibilities:

- Deliver premium adjustment processes end-to-end, including data validation, reconciliation, and variance analysis
- Analyze member-level data and prepare inputs for pricing and policy updates
- Produce accurate client-facing reports and maintain supporting policy data
- Support administration of annuity products, including onboarding and record maintenance
- Reconcile member and payment data across internal systems and external partners
- Develop and maintain process documentation to support standardization and controls
- Collaborate with cross-functional teams including Pricing, Data Analytics, Legal, and Operations

Required Skills and Experience:

- Undergraduate degree in quantitative or business-related field (e.g., Actuarial Science, Data Analytics, Statistics, Finance or Business)
- Strong proficiency in Microsoft Excel and working with large datasets
- Demonstrated analytical and problem-solving skills
- High attention to detail and accuracy
- Effective communication skills, including the ability to simplify complex concepts
- Strong organizational skills and ability to manage multiple priorities
- Interest in developing expertise in pensions, insurance, or annuity products

Email your application to careers.canada@blumontannuity.com including your resume and any covering comments you wish to provide.

Note: The anticipated compensation for this position ranges from \$60,000 to \$90,000. The specific offer may vary depending upon the candidate's skills and experience, job-related knowledge, education, certifications, along with organizational requirements. Decisions will be made on a case-by-case basis. This position is to fill an existing vacancy. Artificial intelligence (AI) is not used, and all hiring decisions are made by our team. Only shortlisted candidates will be contacted. We are committed to providing accommodation for people with disabilities throughout the recruitment process. If you require support, please let us know and we will work with you to meet your needs. All applicants must be legally eligible to work in Canada. Employment is contingent upon the satisfactory completion of pre-employment background and reference checks.
